Sign Post Selection Guide

Emedco offers a range of sign posts. Below we explain the main types so you can select the right post for your needs.

U-Channel Steel Post

- Our most popular (and affordable) option
- Easy assembly and installation - tapered end means one person can install, no digging necessary!
- Durable steel stands up to harsh weather and vehicle impact - choose Galvanized Steel finish or Eco-Friendly Dry Coat finish.
- Available with Reflective Panels, Post Covers, and Diamond-Grade Post Panels.

Square Post

- The best choice for displaying multiple signs - mount a sign on each side of the post with ease.
- Base and sign post components make replacement a breeze - if the sign post breaks, simply insert a new one into the base post!
- Choose between weather- and rust-resistant Galvanized Steel or Composite (lightweight and sturdy).
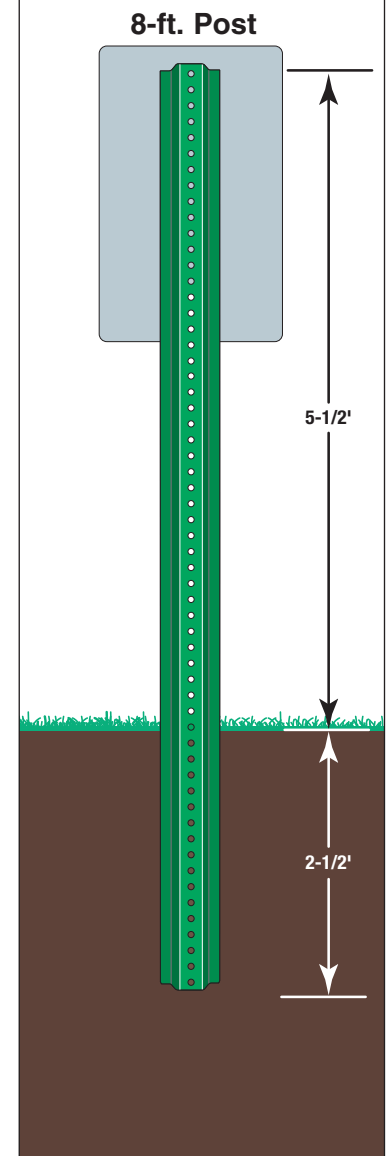

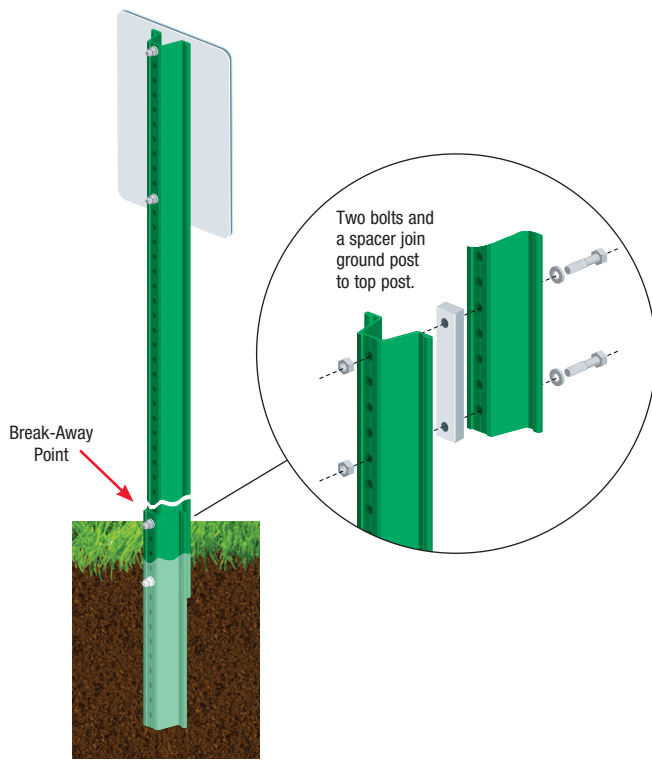

Tubular Post

- The best choice when you need to mount multiple signs at a specific angle.
- Secure sign to post with durable buckle brackets and easily adjust to any height or direction as needed.
- Available in 8 or 10' heights, Galvanized steel resists rust and harsh conditions.
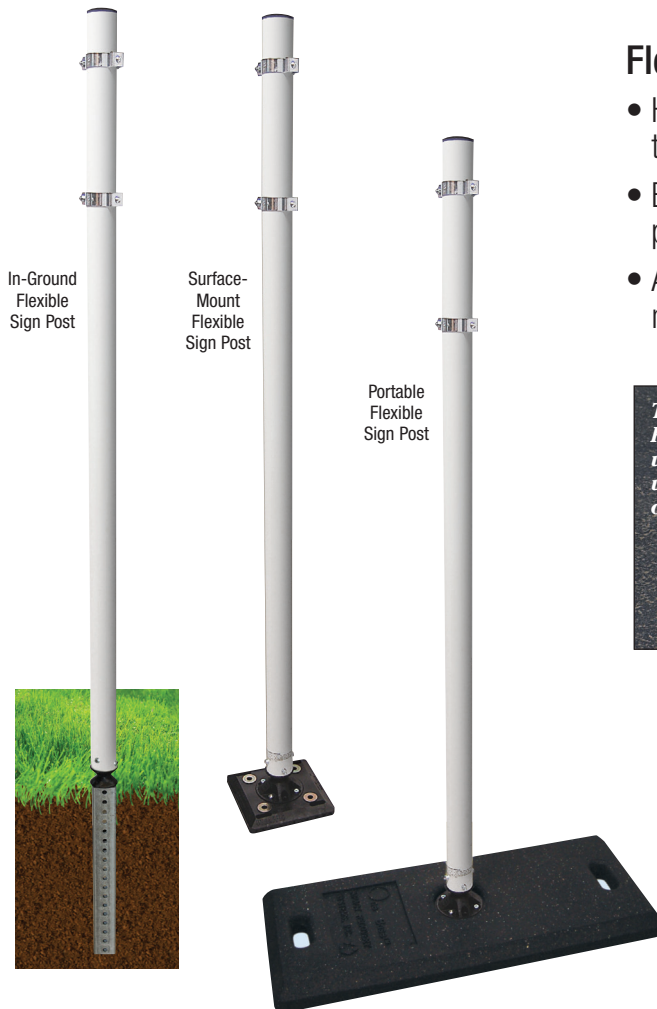

INSTALLATION GUIDELINES

| POST SIZE	PORTION OF THE POST TO BE DRIVEN INTO GROUND
6 - 8 ft.	2-1/2 ft. - 3-1/2 ft.
10 ft.	3-1/2 ft. - 4 ft.

8-ft. Post

5-1/2'

2-1/2'

Break-Away Sign Post

- U-channel steel sign posts separate on impact to reduce damage, saving time and money. After breakaway, simply replace the top post with a standard post.
- Break-away system is made of ribbed-back, high-tensile steel with a green baked enamel finish.
- Post easily drives into even hard clay soils.
- System includes two high-performance bolts, one spacer, one 3-1/2 ft. ground post and top post (choose 8' or 10').

Two bolts and a spacer join ground post to top post.

Break-Away Point

Flexible Sign Post

- Heavy-duty polyethylene posts spring back to their original position without damage.
- Best for use in high-traffic and high-speed areas, posts can withstand up to 60 mph impact.
- Available in portable, in-ground, and surface-mount options with or without reflectivity.

In-Ground Flexible Sign Post

Surface-Mount Flexible Sign Post

Portable Flexible Sign Post

Tested in 100 crashes, Posts return to their upright position without vehicle or post damage.
